- 1) The following is an examiner's statement of reasons for allowance:

The primary reason for allowance is that the cited prior art does not show a method of minimizing vibration in a press roll forming a press nip only with an opposing roll, said method includes the step of adjusting a suspension arm pivot in substantially parallel relation to a linear load such that a mounting line defined by the pivot and the rotational axis of the press roll is maintained in substantially perpendicular relation to the linear load (thereby minimizing vibration in the press roll) (claim 1).

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

- 2) Any inquiry concerning this communication or earlier communications from the examiner should be directed to Mark Halpern whose telephone number is 571-272-1190.
